BLEND SUPPLY JOINS THE RUPES USA AUTHORIZED DISTRIBUTOR NETWORK

As RUPES sanding and polishing systems push further into the industrial and aerospace world, specialized distribution partners such as Blend Supply are instrumental for success.

“Adding the impressive and highly efficient RUPES line, we know our customers will greatly benefit.” -Clint Broadie, President of Blend Supply

RUPES is excited to announce that Blend Supply has joined the RUPES Authorized Distributor Network. As a full-service distributor of industrial and MRO supplies with extensive experience in the industrial, marine, and military markets the impact Blend Supply will have on the RUPES presence in these spaces is expected to be immediate and substantial.

Blend Supply is proud to have the solution-focused RUPES systems as a part of their specialized catalog, and as a company with 75 years' experience servicing aviation clients the Blend Supply team was immediately attracted to the innovative and efficient system-based solutions for their discerning client base. “RUPES being an industry leader in tool and compound manufacturing gives Blend the right partner in improving our customer's processes” says Clint Broadie, President of Blend Supply. “Adding the impressive and highly efficient RUPES line, we know our customers will greatly benefit.”

RUPES USA CEO, Rob Volkert, echoed Clint's sentiments. “Where others provide products, Blend Supply looks to provide their customers with complete finishing solutions. Their knowledgeable and resourceful team provides customers with exceptional service and high-quality product lines, with RUPES being their newest offering. Blend Supply's customer focus aligns well with RUPES USA business philosophies.”

In late 2021 RUPES hosted a team of key technical trainers and subject matter experts from Blend Supply at their state-of-the-art BigFoot Academy. The focus of the multi-day session was to provide an in-depth technical training and strategic planning as the two companies begin to work together in the field. As of this release the Blend and RUPES teams have visited several aviation and aerospace companies with a high-degree of success in these specialized applications.

The teams from Blend Supply and RUPES have worked together extensively to identify the specific technical surface correction challenges of the aerospace industry. Using their combined experience they have developed system based approaches to efficiently solve these challenges.

WE'RE NOT JUST ANOTHER COMPOUND AND POLISH VENDOR. RUPES IS . . .

A PARTNER FOR POLISHING

RUPES IS A SOLUTIONS COMPANY, specializing in helping manufacturers in several industries solve their finishing challenges with system-based approaches. Every project is treated like a consultation where the RUPES technical specialists evaluate the current process, identify opportunities for improvement, and work side-by-side with the customer to implement the process. At RUPES we're not just trying to sell you the latest polishing compound or a new pad. Our team is invested in the idea of providing solutions and solving problems for our clients.

About Blend Supply

Blend Supply is a full-service distributor of coatings, industrial and MRO supplies with deep industry expertise serving the aerospace, industrial, marine and military markets. As they celebrate 75 years in aviation, it is clear why a growing number of people in the industries they represent choose Blend Supply. With a full-service team providing customer service and on-site technical assistance. Blend Supply offers next day delivery options for most of the country from our many distribution centers across the U.S.
